RESPONSIBLE TO:	Regional Manager (Scotland)
LOCATION:	Negotiable Northern Ireland or Scotland dependent on successful candidate, with some travel across NI and Scotland
HOURS OF DUTY:	35 hours per week – fixed contract until 30 th June 2023
SALARY:	NJC Scale 22 £26,317 per annum

What is Social Prescribing?

Social prescribing is a way to link medical care to (typically) non-clinical, locally delivered support services.

Our Project

The SPRING Social Prescribing Project delivers the largest coordinated project of its kind, across Scotland and Northern Ireland, to synthesise learning from across two regions. Over 4,600 people will co-create a social prescription and engage in at least one of the many interventions delivered by our network of experienced community-led health improvement organisations.

This position will require either a relevant third level qualification in IT plus one years' experience in an IT support or data analysis role

Or

Five years' experience in a relevant IT support or data analysis role.
